

Astrology / Biggest Astrology Archetype Help:

If you are every trying to imagine the characteristic of a zodiac sign, remember the one before and the one after have huge influences. The one before is the subconscious of the one you're looking at. The subconscious of a Capricorn is a Sagittarius. And the house of material, values, some level of romance, work, etc. is the 2nd and therefor it's the next sign. This means a Capricorn looks to the material plane, connections, values, and work with an aquarian perspective. Whereas an Aquarian looks to the material plane, connections, values, and work with a Piscean perspective. And has a Capricorn subconscious. Meanwhile A cancer sister sign to cap has the gemini subconscious
